Our Comprehensive Portfolio

API

Active Ingredients selected from leading pharmaceutical manufacturers under exclusivity agreements.

PROPRIETARY API

APIs co-developed with European CMOs that we combine with FDF dossiers for a complete product offering to our clients.

LICENSING

FDF licenses for a wide variety of dosage forms and treatments.

We incorporate a new API every **12 month** to be produced in our CMOs' factories.

We **transfer** this technology to our **European CMOs** - marketing them more efficient and competitive.

50% of our net profits are invested in the **co-development** of molecules with our European partners.

We acquire **technology** to accelerate the **development** of **Dossiers** and **Drug Master Files**.

Contact us to find out more about our CMO partnerships.

We also provide a wide variety of alternative substances from different origins.
For more information and to see our full product range, please get in contact with us at info@capitalfarma.com
